

DIY SCREEN PRINTING AT THE OTHERS

with Jan from NO:ID gallery
(over 10 years teaching experience)

Tuesdays 7pm-10pm. RSVP!

Starts April 6th

£75 for two sessions per 3h each, all material (screen) included

This two-session class is ideal for beginners. At the end, you will have your own design printed. Plus, you will have acquired all the knowledge necessary to produce screen printing at home without need to hire expensive equipment. Since the technique is fundamentally the same as used in industrial printing, you will also be able to design for professional screen print projects. You will own the screen you have made during the course and you will thus be able to continue at home.

We set up a simple D.I.Y. screen printing work space using kitchen equipment that can be scratched together. We will manufacture A4 sized screens using stretchers, mesh, and photo emulsion. We will create photographic screen prints using an improvised exposure unit, and screen print on garments, canvas, board, and paper.

In your first session you will get explanation and a demonstration of the equipment and the process. You will then understand the possibilities and limitations of screen printing, helping you to finalise your design before the second session.

In your second session, you follow the steps as explained in the first session, and – under guidance – manufacture your own screen from your design. This screen you then use to manufacture your own prints – up to a dozen (black ink provided).

The class will be small and intimate. I usually mix people who come for the first time to watch those coming for the second time. You can decide for yourself when to join the class, but you must enroll properly, pay on the first session, and be there on time. Please call me on 07939843968 to reserve your space.
